PRESS RELEASE

Huxen Reports H1 2026 Revenue of NT$1.367 Billion, Up 1.5% Year on Year

Net Income After Tax of NT$154 Million and EPS of NT$1.06

TAIPEI, August 10, 2026 - Huxen Corporation (TWSE: 2433) today announced that its Board of Directors approved the financial statements for the second quarter of 2026. Consolidated revenue increased 2.4% year on year to NT$689 million. Net income after tax decreased 6% to NT$81 million, with after-tax earnings per share of NT$0.56.

For the first half of 2026, Huxen recorded consolidated revenue of NT$1.367 billion, up 1.5% year on year. Net income after tax decreased 3.0% to NT$154 million, with after-tax earnings per share of NT$1.06. As the office market enters its peak season in the second half, Huxen’ s recent efforts to capture ESG opportunities and advance digital transformation are gradually delivering benefits. Institutional analysts believe the Company still has an opportunity to achieve steady profit growth this year.

Looking ahead to the second half, overall market demand is expected to strengthen quarter by quarter as businesses enter the traditional peak season for office procurement. Huxen’ s sustained efforts in green office solutions (ESG) and corporate digital transformation continue to deliver benefits. Institutional analysts expect sequential improvements in second-half operations, with full-year profitability remaining sound.

Huxen is the general agent in Taiwan for office equipment from Japan’ s RICOH. In response to hybrid working and corporate sustainability transformation, Huxen maintains its customer focus through a one-stop digital transformation service platform. Its solutions include office cloud services, intelligent video conferencing systems, digital document output applications and information security, helping businesses improve operating efficiency and strengthen cybersecurity.

To help businesses meet their ESG carbon reduction targets, Huxen combines energy-efficient equipment with the Internet of Things (IoT) and big data to build an ecosystem of intelligent digital services:

Predictive Monitoring and Remote Maintenance: Real-time monitoring of consumables and online maintenance significantly reduce the carbon footprint associated with service engineers’ travel.

Green Report: Visualized carbon emissions and energy-saving data help corporate managers implement green procurement and ESG sustainability policies.

Mobile Customer Service: A dedicated app provides real-time communication and a proactive, personalized customer service experience.

In Mainland China, Huxen continues to expand new equipment leasing and sales, increase market penetration and grow its installed base. Recurring service and consumables income continues to contribute stable revenue and earnings to the Group.
